Volume No. : 39

Title : Multiscale Mathematics: Hierarchy of collective phenomena and interrelations between hierarchy structures

Collaborate Research Meeting of Institute of Mathematics for Industry & MEXT collaborative workshop of mathematics and mathematical sciences with various sciences and industrial technologies 2001

Editors : Institute of Mathematics for Industry, Kyushu University

Written In : English

ISSN : 1881-4042

Published In : 2012年3月13日

Contents:

December 8, 2011

Mathematical Modelling for soil contamination - Creating an interdisciplinary platform for taking aim at mathematical innovation · · · · ·	1
J. NAKAGAWA (Nippon Steel Corporation)	
Existence of phase transition of percolation on fractal lattices · · · · ·	12
M. SHINODA (Nara Women's University)	
Macroscopic corrosion front computations of sulfate attack in sewer pipes based on a micro-macro reaction-diffusion model · · · · ·	22
V. CHALUPECKÝ (Kyushu University)	
Surfactant effect on the multiscale structure of bubbly flows · · · · ·	32
S. TAKAGI (University of Tokyo)	
Multiscale simulation for polymer material design · · · · ·	46
T. AOYAGI (Asahi Kasei Corporation)	
Multiscale simulation of nonlinear phenomena of plasmas · · · · ·	55
R. NUMATA (University of Hyogo)	

December 10, 2011

On the Hamilton-Jacobi variational formulation of the Vlasov equation · ·	64
P. J. MORRISON (University of Texas at Austin)	
A new solution method for singular perturbation problems in magnetized plasmas · · · · ·	75
M. FURUKAWA (University of Tokyo)	
Multi-scale modeling in heterogeneous material properties · · · · ·	84
M. ASAI (Kyushu University)	

Efficient numerical computations on large scale electromagnetic field problems using an iterative domain decomposition method · · · · ·	96
D. TAGAMI (Kyushu University)	
Variational approach to multi-scale dynamical system - an application to collisionless magnetic reconnection - · · · · ·	102
M. HIROTA (Japan Atomic Energy Agency)	
Multiscale characteristics of moist convections and heavy precipitation in the tropics · · · · ·	111
S. YODEN (Kyoto University)	
Dimension reduction study of microseismic activity in the earth's crust and mantle in the plate boundary region · · · · ·	116
M. TORIUMI (JAMESTEC)	

December 11, 2011

On the evolution of copulas · · · · ·	132
N. ISHIMURA (Hitotsubashi University)	
Real indeterminacy and conservation law in random matching models with divisible money · · · · ·	141
K. KAMIYA (University of Tokyo)	
On fundamental of Rayleigh-Taylor turbulent mixing: correlations and fluctuations in statistically unsteady turbulent processes · · ·	151
S. I. ABARZHI (University of Chicago)	
Self-organization in a foliated phase space · · · · ·	170
Z. YOSHIDA (University of Tokyo)
