

## COE Lecture Note Series

Volume No. : 20

Title : MRIT 6th Workshop Math-for-Industry Tutorial : Spectral theories of  
non-Hermitian operators and their application

Editors : Yasuhide Fukumoto, Yasunori Maekawa

Written In : English

ISSN : 1881-4042

Published In : 2009 年6 月30 日

Authors : Sherwin A. Maslowe, Toshiaki Hishida, Setsuro Fujiie, Boris S. Pavlov,  
Francis Nier, Hideo Nakazawa, Makoto Hirota, Stefan Llewellyn Smith

### Contents:

"Critical layers in shear flows" Sherwin A. Maslowe (McGill University)	.....1
"Resonant wave interactions in shear flows" Sherwin A. Maslowe (McGill University)	.....15
"Mathematical analysis of the Navier-Stokes flow around a rotating obstacle" Toshiaki Hishida (Nagoya University)	.....25
"Long time behavior of the Schrödinger group associated with a potential aximum" Setsuro Fujiie (University of Hyogo)	.....43
"Operator extensions, Friedrichs model and some fitted zero-range solvable models" Boris S. Pavlov (University of Auckland)	.....57
"Return to the equilibrium and pseudospectral estimate: a toy model" Francis Nier (Université de Rennes)	.....105
"An aspect for spectral analysis of non-selfadjoint operators -Schrodinger and wave equations- " Hideo Nakazawa (Chiba Institute of Technology)	..... 115
"Action-angle representation of waves in fluids and plasmas: applications to stability analysis and wave-mean field interactions" Makoto Hirota (Japan Atomic Energy Agency)	.....137

"Special theories of non-Hermitian operators and their application"  
Stefan Llewellyn Smith (University of California, San Diego) .....157  
Chap. 1 "Fluid instability, the continuous spectrum and asymptotic models"....159  
Chap. 2 "Vortex axisymmetrization".....172
