Title : Enhanced Binding in Quantum Field Theory

Editors : Fumio Hiroshima, Itaru Sasaki, Herbert Spohn and Akito Suzuki

Written In : English

ISSN : 1881-4042

Published In : 2012年3月12日

Contents:

I Boson Fock space and symplectic structures

1 Boson Fock space

1.1 Second quantization	5
1.2 Segal fields	9
1.3 Wick product	10

2 Symplectic structure

2.1 Infinite dimensional symplectic group	13
2.2 Quadratic operators	15
2.3 Bogoliubov transformations	20
2.3.1 Homogeneous case	20
2.3.2 Inhomogeneous case	22
2.4 One parameter symplectic groups and 2-cocycles	25

II The Pauli-Fierz model

3 The Pauli-Fierz Hamiltonian

3.1 Introduction	29
3.2 The Pauli-Fierz Hamiltonian with the dipole approximation	31
3.3 Translation invariant Hamiltonian	34
3.4 Bogoliubov transformation	38
3.4.1 Algebraic relations	38
3.4.2 Intertwining operator	53
3.4.3 Displacement operator	57
3.5 Diagonalization and time evolution of radiation fields	59
3.5.1 Diagonalization	59
3.5.2 Time evolution of quantized radiation field	63
3.6 Dressed electron states	64
3.7 Ground state energy	66
3.7.1 Holomorphic property	66
3.7.2 Explicit form of effective mass and ground state energy	71

3.7.3	Ultraviolet cutoffs	79
3.7.4	Many particle system	83
3.8	Self-energy term	84
3.8.1	Diagonalization and DES	84
3.8.2	No self-energy term	87
3.9	Scaling limits	88
3.9.1	Weak coupling limit	88
3.9.2	Strong coupling limit	90
3.10	Negative mass	93
4	Binding and non-binding	
4.1	Enhanced binding	99
4.2	Absence of ground state	101
4.3	Existence of ground state	107
4.3.1	Massive case	109
4.3.2	Massless case	116
4.4	Transition from unbinding to binding	120
4.5	Enhanced binding by UV cutoff	121
III The Nelson model		
5	The Nelson Hamiltonian	
5.1	The Nelson Hamiltonian	123
5.2	Enhanced binding	124
5.3	Weak coupling limit	126
6	Binding	
6.1	Existence of ground states	129
6.2	Stability conditions	130
6.3	Examples	137
6.3.1	Example of effective potential	137
6.3.2	Example of external potential	138
7	Absence of ground state	
7.1	Introduction	149
7.1.1	Stability and the decay of variable mass	149
7.1.2	Klein-Gordon equation on pseudo Riemannian manifold	150
7.2	The Nelson model with a variable mass	155
7.2.1	Dirichlet forms and symmetric semigroups	155
7.2.2	Schrödinger operators with divergence form	157
7.2.3	Scalar quantum fields	161
7.2.4	The Nelson model with a variable mass	162
7.3	Feynman-Kac formula and diffusions	165
7.3.1	Super-exponential decay	165

7.3.2	Diffusion processes · · · · ·	174
7.4	Absence of ground state · · · · ·	182
7.4.1	The Nelson model by path measures · · · · ·	182
7.4.2	Absence of ground states · · · · ·	184
